## SUMMARY

Software Engineering aspirant pursuing a B.Tech in Artificial Intelligence & Machine Learning with strong knowledge of Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, and Computer Networks. Experienced in developing scalable full-stack web applications, RESTful APIs, authentication systems, and database-driven solutions using React.js, Node.js, Express.js, MongoDB, PostgreSQL, and SQL. Solved 500+ DSA problems across LeetCode, HackerRank, and GeeksforGeeks. Seeking an opportunity to contribute as a Software Development Engineer by building secure, scalable, and high-performance applications.

## EDUCATION

### Bachelor of Technology in Artificial Intelligence & Machine Learning

Pranveer Singh Institute of Technology, Kanpur

2023 – Present

CGPA: 8.1 | Percentage: 79.33% (Till 6th Semester)

### Intermediate (UP Board), B.R.D. Inter College, Musanagar

Percentage: 77%

2021 – 2022

### High School (UP Board), B.R.D. Inter College, Musanagar

Percentage: 81%

2019 – 2020

## TECHNICAL SKILLS

**Languages:** C++, Python, JavaScript, SQL

**Frontend:** HTML, CSS, React.js, Tailwind CSS

**Backend:** Node.js, Express.js, RESTful API Development, JWT Authentication

**Databases:** MongoDB, PostgreSQL, MySQL, Mongoose, Schema Design

**Tools & Platforms:** Git, GitHub, Docker, Postman, VS Code, Vercel, CI/CD (GitHub Actions)

**Core Subjects:** Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks, Software Engineering

**Data & ML:** Pandas, NumPy, Matplotlib, Scikit-Learn, Power BI

## EXPERIENCE

### Software Developer | Academic Projects

Pranveer Singh Institute of Technology, Kanpur

2023 – Present

- Designed and developed RESTful APIs using Node.js and Express.js for backend applications.
- Built full-stack web applications using React.js, Node.js, Express.js, and MongoDB following modular architecture.
- Implemented Data Structures and Algorithms in C++ to solve algorithmic problems and optimize application performance.
- Developed machine learning models using Python, Pandas, NumPy, and Scikit-Learn for classification and recommendation systems.
- Used Git and GitHub for version control, collaboration, and source code management.
- Followed Agile software development practices, debugging, testing, and iterative software development lifecycle.

## PROJECTS

### AI SaaS Dashboard | React, Node.js, Express, MongoDB, Groq LLaMA API, JWT

- Developed a full-stack AI SaaS platform using React.js, Node.js, Express.js, MongoDB, and Groq LLaMA API.
- Built secure RESTful APIs with JWT authentication, bcrypt password hashing, protected routes, and middleware.
- Developed a responsive analytics dashboard to monitor AI usage and token consumption using Recharts.
- Deployed frontend and backend applications on Vercel using GitHub-based version control and CI/CD workflow.

### Bank Transaction System (Backend) | Node.js, Express, MongoDB, JWT

- Developed a backend banking application using Node.js, Express.js, and MongoDB supporting account management and transactions.
- Designed secure RESTful APIs following MVC architecture with middleware and modular routing.
- Implemented JWT authentication, bcrypt password hashing, authorization, and input validation.
- Managed MongoDB collections using CRUD operations and modular database architecture.

### Movie Recommendation System (ML) | Python, Pandas, NumPy, Scikit-Learn

- Developed a content-based movie recommendation system using TF-IDF, cosine similarity, and natural language processing.
- Performed data preprocessing and feature engineering on 4,800+ movie records using Pandas and NumPy.
- Built a scalable recommendation pipeline using Scikit-Learn for personalized movie recommendations.

## CERTIFICATIONS

- Oracle Cloud Infrastructure AI Foundations Associate — Oracle (2025)
- Python Programming (Part 1, 2) — Infosys Springboard (2024)
- Getting Started with Node.js — SkillUp (2026)

## ACHIEVEMENTS

- Solved 500+ Data Structures & Algorithms problems across LeetCode, HackerRank, and GeeksforGeeks.
- Developed full-stack MERN applications and participated in Atom-Quest Hackathon 2026.
