SUMMARY

Aspiring AI Software Engineer with strong foundations in Data Structures Algorithms, Machine Learning, and full-stack development. Self-starter with high ownership, experienced in building and deploying AI-powered applications. Seeking to contribute to a collaborative team while growing in AI, backend, databases, and API development.

Academic Details

Bachelor of Technology in Artificial Intelligence & Machine Learning Pranveer Singh Institute of Technology, Kanpur	2023 – Present Percentage: 79.33%(CGPA:8.10/10)
Intermediate (UP Board) B.R.D. Inter College, Musanagar	2021 – 2022 Percentage: 77%
High School (UP Board) B.R.D. Inter College, Musanagar	2019 – 2020 Percentage: 81%

Technical Competencies

- Languages:** Java, C++, Python, JavaScript, SQL
- Frontend:** HTML, CSS, React.js, Tailwind CSS
- Backend:** Node.js, Express.js, RESTful API Development, JWT Authentication
- Databases:** MongoDB, PostgreSQL, MySQL
- ML libraries:** Pandas, NumPy, Matplotlib, Scikit-Learn, TensorFlow, PyTorch
- Machine Learning:** Linear Regression, Logistic Regression, Decision Trees, Random Forest, K-Means Clustering, K-Nearest Neighbors, Support Vector Machines, CNN-based Deep Learning
- Core Subjects:** Data Structures & Algorithms, Object Oriented Programming, Operating Systems, Database Management Systems, Software Engineering, Cloud Computing Fundamentals

Projects

- AI SaaS Dashboard | React, Node.js, Express, MongoDB, Groq LLaMA API, JWT**
- Developed a full-stack AI SaaS platform using React.js, Node.js, Express.js, MongoDB, and Groq LLaMA API.
 - Built secure RESTful APIs with JWT authentication, bcrypt password hashing, protected routes, and middleware.
 - Designed a responsive analytics dashboard to monitor AI usage and token consumption.
 - Deployed frontend and backend applications on Vercel using GitHub-based version control and CI/CD workflow.
- Movie Recommendation System (ML) | Python, Pandas, NumPy, Scikit-Learn**
- Built a content-based movie recommendation system using TF-IDF and cosine similarity.
 - Performed data preprocessing and feature engineering on 4,800+ movie records using Pandas and NumPy.
 - Built a scalable recommendation pipeline using Scikit-Learn for personalized movie recommendations.
- Network Intrusion Detection System**
- Built an ML-based intrusion detection system using Python and Scikit-learn
 - Designed backend services and REST APIs to process and analyze real-time data
 - Applied preprocessing, feature engineering, and model optimization techniques
 - Evaluated model performance using precision, recall, and F1-score
 - Implemented a machine learning pipeline for intrusion detection using feature engineering and classification models.

Certifications

Oracle Cloud Infrastructure AI Foundations Associate — Oracle	2025
Python Programming (Part 1, 2) — Infosys Springboard	2024
Getting Started with Node.js — Skillup	2026

Achievements

- Solved 500+ Data Structures & Algorithms problems across LeetCode, HackerRank, and GeeksforGeeks.
- Successfully developed a full-stack web application at Atom-Quest Hackathon 2026, focusing on responsive UI design, backend integration, and database management
